

*Plotting graph using local file*

Graph shown below is displayed using a source file in working directory. This local R code is reading the data file and plotting a scatter plot with x = miles walked by the FitBit users and y = steps walked.

```
> source("E2p2Ques3Local.R")
```

*Plotting graph using Remote file*

Graph shown below is displayed using a source file stored in GitHub. The remote R code is reading the data file and plotting a scatterplot with y = miles walked by the FitBit users and x = steps walked.

```
> library(devtools)
> x <- "https://raw.githubusercontent.com/mjain4/rstudio-export/master/E2p2Ques3Remote.R"
> source_url(x)
```
